

Table of contents

1	Introduction	1
1.1	Persistent organic pollutants (POPs)	1
1.1.1	Stockholm Convention on Persistent organic pollutants.....	3
1.1.2	PCBs	5
1.1.2.1	Structure and formation.....	5
1.1.2.2	Origin and use.....	6
1.1.2.3	Toxicity.....	6
1.1.2.4	Effects of PCBs on humans	8
1.1.3	Pesticides	8
1.1.3.1	Dichlorodiphenyltrichloroethane (DDT).....	9
1.1.3.2	Hexachlorobenzene (HCB).....	10
1.1.3.3	Toxaphene	11
1.2	Icelandic environment	12
1.2.1	The ocean around Iceland.....	13
1.2.2	Limits and regulations	13
1.3	Research objectives	14
2	Materials and methods.....	15
2.1	Selection and treatment of samples	15
2.1.1	Samples from the project: Factors influencing the quality and value of the Icelandic cod; a value chain perspective	15
2.1.2	Oven baked cod	17
2.1.3	Chicken breast	17
2.2	Pressurised solvent extraction (PSE).....	18
2.2.1	Preparation of samples for analysis	18
2.2.2	Extraction using ASE300 Accelerated solvent extraction	19
2.2.3	Cleaning of samples following extraction	20
2.3	Gas chromatography.....	21
2.4	Quality assurance.....	22
2.4.1	Reference material	22
2.4.2	Prevention of contamination between samples	22
2.4.3	Limits of detection	23
2.5	Calculation.....	23
2.6	Statistical analysis	24
3	Results.....	25
3.1	Persistent organic pollutants in cod muscle.....	25
3.1.1	Factors that affect the Σ PCB7	27
3.1.2	PCB-52 vs. PCB-153	28
3.2	Persistent organic pollutants in cod liver.....	30
3.2.1	PCBs in cod liver.....	33
3.2.2	Pesticides in cod liver	34

3.2.3	Σ PCB7 in cod liver compared to cod muscle.....	35
3.2.4	PCBs in muscles from whole fish vs. fish from the processing plants.....	37
3.3	Persistent organic pollutants in oven baked cod muscle	38
3.4	Persistent organic pollutants in chicken breast.....	38
4	Discussion	39
5	Conclusion	44
6	References.....	45
7	Appendices	a
	Appendix I.....	a
	Appendix II.....	b
	Appendix III	e
	Appendix IV	g
