

Table of Contents

List of Figures	ix
List of Tables.....	x
Acronyms.....	xi
Acknowledgements	xiii
1 Introduction	1
2 Chapter 1: Plastic Ingestion in Atlantic Cod (<i>Gadus morhua</i>): Results from a Citizen Science Monitoring Project on the East Coast of Newfoundland, Canada.....	5
2.1 Introduction	5
2.2 Background	7
2.2.1 Production & demand	7
2.2.2 Marine inputs	8
2.2.3 Marine microplastics.....	9
2.2.4 Distribution	10
2.2.5 Ingestion.....	13
2.2.6 Impacts of ingestion.....	16
2.3 Regional Considerations	20
2.3.1 Newfoundland as a study site	21
2.4 Research Questions	23
2.5 Methodology	23
2.5.1 Field sampling by fishers	23
2.5.2 Gastrointestinal tract collections.....	25
2.5.3 Dissection of GI tracts	26
2.5.4 Contamination.....	27
2.5.5 Quantification of plastics	28
2.5.6 Raman micro-spectrometry.....	30
2.5.7 Data processing.....	30
2.6 Results	31
2.7 Discussion	43
2.7.1 Implications of findings for describing marine plastics in Newfoundland.....	43
2.7.2 The importance of standardization and place for long-term monitoring	53
2.7.3 Future considerations for a long term monitoring program in Newfoundland.....	55
3 Chapter 2: Towards Citizen Science Biomonitoring of Marine Plastics in Newfoundland	57
3.1 Executive Summary	57
3.2 Plastics as a Marine Pollutant.....	59
3.2.1 A global pollutant in Newfoundland waters	59
3.2.2 Environmental impacts	62
3.2.3 Implications for human health	63
3.2.4 Implications for local culture	65

3.2.5	Economic impacts.....	66
3.2.6	Barriers to monitoring and removal.....	67
3.3	Participatory monitoring of marine plastics in rural Newfoundland	68
3.3.1	Defining the source.....	68
3.3.2	Promoting awareness through participatory research.....	69
3.3.3	Community based participatory research in rural Newfoundland	69
3.3.4	Organisation.....	70
3.3.5	Communication of results.....	71
3.3.6	Suitability of biomonitoring to CBPR in Newfoundland	72
3.3.7	Ethics	73
3.3.8	Action research	74
3.4	Conclusion	75
4	Conclusion	77
References	79
Appendix	97
